

Spring in Action FOURTH EDITION

ABOUT THE BOOK

Spring in Action, Fourth Edition is a hands-on guide to the Spring Framework. It covers Spring core, along with the latest updates to Spring MVC, Security, Web Flow, and more. You'll move between short snippets and an ongoing example as you learn to build simple and efficient JEE applications. Author Craig Walls has a special knack for crisp and entertaining examples that zoom in on the features and techniques you really need.

Nearly 100,000 developers have used this book to learn Spring! It requires a working knowledge of Java.

FEATURES

- ⇒ Updated for Spring 4
- ⇒ Spring Data for NoSQL
- ⇒ Simplifying configuration with annotations and definition profiles
- ⇒ Working with RESTful resources

ISBN: 9789351197997 • Pages: 624 • Author: Craig Walls

SUMMARY

Spring in Action, Fourth Edition is a hands-on guide to the Spring Framework, updated for version 4. It covers the latest features, tools, and practices including Spring MVC, REST, Security, Web Flow, and more. You'll move between short snippets and an ongoing example as you learn to build simple and efficient J2EE applications. Author Craig Walls has a special knack for crisp and entertaining examples that zoom in on the features and techniques you really need.

ABOUT THE AUTHORS

Craig Walls is a software developer at Pivotal. He's a popular author and a frequent speaker at user groups and conferences. Craig lives in Cross Roads, Texas.

TABLE OF CONTENTS

PART 1 CORE SPRING

- 1 **Springing into action**
 - Simplifying Java development
 - Containing your beans
 - Surveying the Spring landscape
 - What's new in Spring
- 2 **Wiring beans**
 - Exploring Spring's configuration options
 - Automatically wiring beans
 - Wiring beans with Java
 - Wiring beans with XML
 - Importing and mixing configurations
- 3 **Advanced wiring**
 - Environments and profiles
 - Conditional beans
 - Addressing ambiguity in autowiring
 - Scoping beans
 - Runtime value injection
- 4 **Aspect-oriented Spring**
 - What is aspect-oriented programming?
 - Selecting join points with pointcuts
 - Creating annotated aspects
 - Declaring aspects in XML
 - Injecting AspectJ aspects

PART 2 SPRING ON THE WEB

- 5 **Building Spring web applications**
 - Getting started with Spring MVC
 - Writing a simple controller
 - Accepting request input
 - Processing forms
- 6 **Rendering web views**
 - Understanding view resolution
 - Creating JSP views
 - Defining a layout with Apache Tiles views
 - Working with Thymeleaf
 - Summary
- 7 **Advanced Spring MVC**
 - Alternate Spring MVC configuration
 - Processing multipart form data
 - Handling exceptions
 - Advising controllers
 - Carrying data across redirect requests
- 8 **Working with Spring Web Flow**
 - Configuring Web Flow in Spring
 - The components of a flow
 - Putting it all together: the pizza flow
 - Securing web flows
- 9 **Securing web applications**
 - Getting started with Spring Security
 - Selecting user details services
 - Intercepting requests
 - Authenticating users
 - Securing the view

PART 3 SPRING IN THE BACK END

- 10 **Hitting the database with Spring and JDBC**
 - Learning Spring's data-access philosophy
 - Configuring a data source
 - Using JDBC with Spring
- 11 **Persisting data with object-relational mapping**
 - Integrating Hibernate with Spring
 - Spring and the Java Persistence API
 - Automatic JPA repositories with Spring Data
- 12 **Working with NoSQL databases**
 - Persisting documents with MongoDB
 - Working with graph data in Neo4j
 - Working with key-value data in Redis
- 13 **Caching data**
 - Enabling cache support
 - Annotating methods for caching
 - Declaring caching in XML
- 14 **Securing methods**
 - Securing methods with annotations
 - Using expressions for method-level security

PART 4 INTEGRATING SPRING

- 15 **Working with remote services**
 - An overview of Spring remoting
 - Working with RMI
 - Exposing remote services with Hessian and Burlap
 - Using Spring's HttpInvoker
 - Publishing and consuming web services
- 16 **Creating REST APIs with Spring MVC**
 - Getting REST
 - Creating your first REST endpoint
 - Serving more than resources
 - Consuming REST resources
- 17 **Messaging in Spring**
 - A brief introduction to asynchronous messaging
 - Sending messages with JMS
 - Messaging with AMQP
- 18 **Messaging with WebSocket and STOMP**
 - Working with Spring's low-level WebSocket API
 - Coping with a lack of WebSocket support
 - Working with STOMP messaging
 - Working with user-targeted messages
 - Handling message exceptions
- 19 **Sending email with Spring**
 - Configuring Spring to send email
 - Constructing rich email messages
 - Generating email with templates
- 20 **Managing Spring beans with JMX**
 - Exporting Spring beans as MBeans
 - Remoting MBeans
 - Handling notifications
- 21 **Simplifying Spring development with Spring Boot**
 - Introducing Spring Boot
 - Building an application with Spring Boot
 - Going Groovy with the Spring Boot CLI
